

# SOLAR/DC BATTERY POWER STATION 1000W

Connexion's Solar/DC Battery Power Station 1000w – (Powercell1280) is a robust and portable battery power station designed to provide reliable energy storage and on-the-go power.

**PART NO: POWERCELL1280**

## FEATURES

- ✓ AC output (Max.): 1000W
- ✓ Charging voltage/amp: 29.2v/7
- ✓ Charging time: 8-9hrs
- ✓ Battery cells: Lithium Phosphate
- ✓ IP rate: 44

# TECHNICAL SPECIFICATION

|                      |                                     |
|----------------------|-------------------------------------|
| Product              | Solar/DC Battery Power Station 1000 |
| Part No              | Powercell1280                       |
| Input socket         | 2 /DC/ Solar                        |
| Output socket        | 2x16A (BSEN 60309)                  |
| Capacity             | 1280Wh/25.6V 50AH                   |
| AC output (Max.)     | 1000W                               |
| Output Volt          | 110v AC                             |
| Charging voltage/Amp | 29.2v/7A                            |
| Charging time        | 8-9hrs                              |
| Solar charging time  | 120Watt for 15-20hrs                |
| Battery cells        | Lithium Phosphate (LiFePo4)         |
| IP rate              | 44                                  |
| Cycle life           | 2000+                               |
| Colour               | Yellow                              |
| Charging Temperature | 0~45°C                              |
| Working Temperature  | -20~60°C                            |
| GTIN                 | 5023003002340                       |
